PROFESSIONAL SUMMARY

A System Architect focused on architecting systems that are not only efficient and secure today but are built to scale, adapt, and deliver a compounding return on investment for years to come.

PROFESSIONAL EXPERIENCE & PROJECTS

1 Clask | Lead Developer (October - December 2025)

A unified, real-time digital classroom workspace bridging individual productivity with collaborative school tracking. Features an interactive calendar, secure class enrollment codes, a global assignment feed with priority filters, and real-time notifications.

Technologies: Kotlin, Native Android, PHP, MySQL, Retrofit2, Coroutines.

2 LabFlow | Full-Stack Developer (January - April 2026)

A centralized, QR-code-driven digital platform to streamline laboratory inventory and equipment borrowing. Features role-based workflows, accountability logging, AI-powered apparatus suggestions, and an offline-capable PWA architecture.

Technologies: PHP, MVC, Tailwind CSS, PWA, AI/LLM.

3 Cebu Dorm Finder | Full-Stack Developer (April 2026 - Ongoing)

An intelligent, location-aware matching engine that aggregates and standardizes student housing listings. Features an automated web harvester, Gemini API-powered data verification, safety scoring against flood maps, and an interactive Leaflet.js dashboard.

Technologies: Node.js, Python, Gemini API, MariaDB, Leaflet.js.

4 MJ Ecosystem | Full-Stack Developer (February - May 2026)

A sophisticated, "Self-Learning Coffee Shop" application using machine learning to forecast sales and optimize inventory. Features a chained ML pipeline, session-based forecast previews, and an atomic database transaction layer for inventory integrity.

Technologies: Django, Python, Machine Learning, MySQL, Tailwind CSS.

5 WMSU Faculty Leave Application | Full-Stack Developer (September - December 2025)

A comprehensive digital Leave Management System that fully automates the faculty leave application, tracking, and approval cycle. Features automated email notifications (PHPMailer) and dynamic PDF generation (TCPDF).

Technologies: PHP, OOP, SQL, PHPMailer, TCPDF.

6 ZCMC Cancer Registry | Full-Stack Developer (Internship) (February - May 2026)

Enhanced a specialized medical web application for cancer data surveillance. Implemented an interactive dashboard with Recharts, multi-step clinical intake forms, a keyboard-driven command palette (Ctrl+K), and modern UX enhancements like skeleton loading and toast notifications.

Technologies: Laravel, Next.js, React, TypeScript, shadcn/ui, Recharts.

EDUCATION

Associate in Computer Technology,
Major in Application Development
Expected Graduation: 2026

Senior High School,
STEM Track
Batch of 2024

LEADERSHIP & AFFILIATIONS

Vice President | Philippine Computing Studies Society (PhiCSS)

Logistics Member | College Student Council (CSC)

Active Member | Google Developer Group (GDG)

CORE COMPETENCIES & TECHNICAL SKILLS

Architectural Paradigms:

- Object-Oriented Programming (OOP)
- Model-View-Controller (MVC)
- Architecture
- Agile Methodology
- Role-Based Access Control (RBAC)
- Forensic Logging & Data Integrity

Technical Stack:

Backend: PHP (Laravel),
Python (Django)

Frontend: JavaScript (React,
Next.js), TypeScript,
Tailwind CSS

Databases: MySQL, MariaDB

Mobile: Native Android (Kotlin)

Machine Learning: Predictive
Modeling, Gemini API
Integration

Domains of Experience:

Full-Stack Medical &
Clinical Systems

Educational Technology &
Student Utilities

HR & Laboratory
Management Systems (LMS)

Marketing Analysis &
Predictive Models

Interactive UI/UX
Development
